DynOrgan

Box containing 60 capsules

Box containing 90 capsules

Box containing 120 capsules

DynOrgan is a powerful depurative

Consisting of a blend of plants with specific properties allowing the evacuation of toxins and boosting the functions of vital organs (liver, spleen, pancreas, kidneys, gall bladder).

DynOrgan is a blood purifier

By its fluidifying action, it allows better blood circulation in the arteries and in the body, a for better functioning of cells.

Action of DynOrgan:

DynOrgan is a depurative that cleans vital organs (liver, spleen, pancreas, kidneys, gall-bladder, etc.). DynOrgan clears conduits from stones (calculus) and accumulations of fat. It also regulates and invigorates the metabolism. DynOrgan is composed of plants and substances that ensure the proper functioning and the stimulation of vital organs (namely: the liver, spleen, pancreas, kidneys and gall-bladder) with the following objectives:

- Ensure efficient elimination of toxins.
- Improve the overall metabolism and general condition of those internal organs
- Moreover, for people undertaking a diet to lose weight, DynOrgan will help and support the whole process of losing weight by stimulating the organs implied in the elimination.
- DynOrgan can also alleviate some back pains caused by kidney problems.

Some other plants and substances could be viewed as excipients, in fact their role is to facilitate and control the assimilation of the preparation to insure its slow dilution over time and its distribution to the targeted organs.

Instructions:

For a cleansing cure, take two capsules with water three times a day after the meals for 10 days, then take one to two capsules par day. It is recommended to undergo a cleansing cure on a seasonal basis, every 3 to 4 months.

As a preventive treatment, take one to two capsules per day after dinner or before going to bed.

Composition:

Apium graveolens, Acorus calamus, Rheum officinale, Agapanthus, Glycyrrhiza glabra - Plant origin capsules.

Complementary treatment:

A depurative cure will always constitute an excellent basis to ensure the efficiency of almost any other targeted treatment.

TensioReg:

As a regulator of the blood pressure, TensioReg stimulates the kidney functions, nourishes the cardiac muscle, regulates the heart rhythm and increases the resilience of the blood vessels.

A TensioReg treatment gets more efficient when combined with DynOrgan, which allows for the evacuation of toxins accumulated in the vital organs. Those toxin residues can be caused by the usage of allopathic medicines and compounds as well as by unhealthy food habits. DynOrgan will also stimulate the liver and kidneys' functions, enabling TensioReg to take effect quickly and efficiently.

Berger's disease:

The combination of TensioReg and DynOrgan has shown to be effective in the treatment of Berger's Disease (glomerular nephritis- the presence of blood in urine).

It is advised to start off with a regular 10 days DynOrgan cleansing cure (6 capsules per day - 2 capsules after each meal) while taking one capsule of TensioReg per day (100mg or 200mg depending on the necessity to combine with a blood pressure treatment). After the initial 10 days cure, continue taking 2 DynOrgan capsules, along with one TensioReg capsule per day for two months.

At first, the presence of blood in the urine will slightly increase, it is the DynOrgan depurative effect, which eliminates some of the blood deposit accumulated in the kidneys. After a two months treatment, it is recommended to get a urine analysis in order to compare the results. The blood level should be much lower.

Following the initial two months cure, it is advisable to take one capsule of TensioReg and DynOrgan per day in order to maintain proper kidney functions and to control the level of blood in the urine.

- TensioReg:200 Box of 60 – 90 – 210 capsules

Deflatil:

Deflatil reduces the formation of gas by limiting, right at its source, the fermentations and the presence of moulds in the intestines. It is also very effective in the cases of intestinal inflammations and diverticulitis.

DynOrgan and Deflatil have very complementary effects on the overall digestive process. DynOrgan stimulates the hepatic and the digestive functions at the stomach level while Deflatil acts at the level of the intestine and colon.

- Deflatil: Box of 60 – 90 capsules of 375 mg

SanDiaril:

SanDiaril treats sudden and acute diarrhoea, as well as chronic diarrhoea. Again, DynOrgan and SanDiaril have very complementary effects whereas SanDiaril work at the intestinal level in order to reabsorb the inflammations while reducing the movement of the longitudinal and circular smooth muscles responsible for the peristalsis and the spasms. It will also act as a disinfectant to fight germs, viruses and parasites.

- SanDiaril: Box of 60 – 90 capsules of 375 mg
